Participants			
Female:	62		
Male:	14		
Non-binary:	0		
From country 1 [Romania]:	76		
Total number of participants:	76	From total number of countries:	1
Description			
<i>Provide a short description of the event and its activities.</i>			
<p>The Local Film Event in Romania, under the project “D.B.Y. - Directed by You(th)” was organized by AICSCC - Gamma Institute took part on 20th of April 2024 in Mihail Kogalniceanu University in Iasi and was addressed both to young people, teachers working in highschools and specialists working in youth and personal development field.</p> <p>The event was structured in 3 main parts: in the first part, the project and its activities was presented and the participants could see the results of the project (especially the short movies made by young people during the workshops). The second part was addressed to youth problems in terms of personal development and how methods as storytelling and video-making were used with this purpose. In this part, youngsters discussed about planning their future and how to include activities for the community in their daily life. In the third part of the event, we discussed about storytelling and video-making as an</p>			

useful method for helping young people to make their voice heard by other people and especially by adults in decision-making positions.

Besides the open discussions about the methods used in the project, the short movies were projected and we discussed the structure of the movies, the messages behind them and how the youngsters arrived to the scenario they made, through the movies. The 2 movies presented in Thessaloniki were also projected and we explained how was the process of making them and why we chose them to be presented in the International Film Festival.

After these presentations and discussions, we made an interactive part, with a storytelling exercise, on which the participants could experience the method. They were asked to draw 3 circles, in which to write: their problems, the problems that the other people are facing and the problems of the world, in general. After that, they were asked to change their papers (they worked into groups of 5 persons) and they had to find answers to the problems they received from the others. At the end, each group was provoked to record a 2 minutes video, putting in a scene the solution they found. After the exercise, as a conclusion, the participants discussed about the effect that recording their roleplay had on the way they felt during the exercise.

At the very end of the event, we invited once again the participants to follow the Youtube channel of the project, to watch all the movies (not only the ones made in Romania) and to try to understand the voice that youngsters want to have behind all these scenarios.

All the participants completed a feedback questionnaire and received a participation diploma for the event. The feedback that we received was a positive one and especially the specialists working with young people (psychologists, psychotherapists, personal development counsellors) were amazed by the method of video-making that can have such an effect on the openness of young people and their emotional expression.
